Summary

Data-driven Technical Recruiter capable of Advanced Boolean Search to identify and mine top candidates with a strong Software Development background, specializing in building web and mobile applications that are aesthetically pleasing and logic-driven.

There's nothing like the thrill of a candidate's enthusiastic "Yes!" to an offer and an equally pleased Hiring Manager who just landed a top performer. Perhaps even more satisfying is successfully recruiting a superstar and then seeing them develop a billion-dollar product. Knowing my efforts impact the bottom line keeps me going every day.

In addition to my knowledge base, I actively seek out new technologies and stay up-to-date on industry trends and advancements. I am currently building experience in Designing H.R. Processes, Technical Recruiting, Talent Sourcing, Strategy Development, Recruitment and Selection, Employee onboarding, Payroll Management, HRIS, Employer branding, Learning and development, and other Human Resources functions spanning Tech startups, Consulting, Financial technology space, and N.G.O. sectors.

This has allowed me to stay ahead of the curve and deliver exceptional work to all of my clients.

Education

Apr 2015 - Apr 2019

BSc. Microbiology

Obafemi Awolowo University, Ile-Ife

Employment

Apr 2022 - Present

[Recruitment Consultant - Contract](#)

HR Stream, Utah, U.S.A
