I am a Technical Recruiter with a strong Software Development background; specialized in building web applications that are aesthetically pleasing and logic driven.

There's nothing like the thrill of a candidate's enthusiastic "Yes!" to an offer, and an equally pleased Hiring Manager who just landed a top performer. Perhaps even more satisfying is successfully recruiting a superstar and then seeing him/her develop a billion-dollar product. Knowing my efforts impact the bottom line keeps me going every day.

In addition to my knowledge base, I actively seek out new technologies and stay up-to-date on industry trends and advancements. This has allowed me to stay ahead of the curve and deliver exceptional works to all of my clients.
