Data-driven Technical Recruiter capable of Advanced Boolean Search to identify and mine top candidates with a strong Software Development background; specialized in building web and mobile applications that are aesthetically pleasing and logic driven.

There's nothing like the thrill of a candidate's enthusiastic "Yes!" to an offer, and an equally pleased Hiring Manager who just landed a top performer. Perhaps even more satisfying is successfully recruiting a superstar and then seeing him/her develop a billion-dollar product. Knowing my efforts impact the bottom line keeps me going every day.

In addition to my knowledge base, I actively seek out new technologies and stay up-to-date on industry trends and advancements, currently building experience in Designing HR Processes, Technical Recruiting, Talent Sourcing, Strategy Development, Recruitment and Selection, Employee on-boarding, Payroll Management, HRIS, Employer branding, Learning and development, and other Human Resources functions spanning across Tech Start-ups, Consulting, Financial technology space and NGO sectors.
This has allowed me to stay ahead of the curve and deliver exceptional work to all of my clients.

Work Experience

Frontend Developer || Technical Recruiter
Pericius Technologies Pvt. Ltd - Bengaluru, Karnataka
September 2021 to March 2022

• Pinpoint candidate motivators and used them to successfully recruit quality candidates.
• Analyze job descriptions and communicated with the Hiring Manager (Pericius Technologies Pvt. Ltd) to clarify terms that could be vague; earned job-satisfaction rates of 95 percent from candidate/company matches as a result of this attention to detail.

• Create new features, functionality and capabilities, specifically in the Contract Management System using ReactJS, Ant Design, Material UI and Java.
• Perform bug fixes and code reviews.
• Recommend solutions for a streamlined, user-friendly interface with the design team.
